

Future of MailFLOW

- Enough support for 1996
- But...for a lightweight service
- and lower contributions

MaiFLOW basics (here to stay)

- Mapping tables
- Routing tables (access control?)
- Tools maintenance

Lower profile features

- Information services (ftp etc)
- Mailing lists
- Manager meetings
- Reports

Phase-out features

- Service monitoring
- Problem solving
- Newcomer support
- Travel budget

1997 and onwards?

- Early review in March 1996
 - continuation using static tables
 - using DNS
 - using X.500
- Commercialisation
